"Our Little Navy."

The New Orleans Delta talks very complacently of "our little navy." It says: "We said a visit to our ship yard at Alpiem, in response to an invitation from Captain Brushwood of the cutter Washington..."

A number of prominent gentlemen attended a handsome collation served up by Captain H. on the occasion. The Washington is a beautiful cutter of the largest size—about two hundred tons. She has been entirely rebuilt in our ship yards...

The Washington only needs her armament to go into active service, and promises, in conjunction with the McCloud to prove of great benefit to our New Government.

We saw, too, at the ship-yards at Alpiem, several other ships of the Confederate States, which are being fitted up with great rapidity and completeness for the service. Among these are the Star of the West, captured by Major Van Dorn...

The fitting up of these vessels and of several privateers, imparts great life and activity to our ship-yards.

It is usual when a train is called to a halt to wave a light in front of the train as a signal. The conductor and passengers assure that no such light was displayed...

The train was promptly stopped on being fired into, but was suffered to come on to Baltimore arriving about daylight.

The train was promptly stopped on being fired into, but was suffered to come on to Baltimore arriving about daylight.

Valley Spirit.

PUBLISHED EVERY Wednesday and Saturday Morning.

CHAMBERSBURG, JUNE 5, 1861

Death of Stephen A. Douglas.

HON. STEPHEN A. DOUGLAS died at Chicago on Monday. The intelligence will cause emotions of the deepest sadness throughout the whole country.

More Troops.

On Saturday last a large number of U. S. Baggage Wagons arrived in this place, and on the same day a brigade of cavalry, numbering about five hundred also arrived and are encamped in the grove, near the Gate-House, on the north side of town.

Safe Investment.

We would direct the attention of those having money to invest to the advertisement, in to-days paper over the signature of the Cashier of the Bank of Chambersburg.

The Eclectic Magazine.

We have received the June number of this excellent work of Foreign Literature, which is well filled with the very choicest selections.

Soldiers, Attention!

SHRECK & SMITH have for sale several publications, suitable for military men—officers or privates—the "Soldiers Companion" and the "Zouave Drill," price 25 cents each.

The Knickerbocker.

The Knickerbocker Magazine for June has been received, and it is only necessary to say that it fully sustains its character, as one of the best and most brilliant Magazines of the day.

Horrible Occurrence.

On Saturday afternoon a number of soldiers, from different companies, collected in that disreputable quarter of our town, known as Wolfstown, and for some cause, that we have not been able to clearly ascertain, made an attack upon a house occupied by a colored man named Frank Jones.

A large and excited crowd soon collected at the spot and threats were very freely made to burn the body, quarter it, &c. Several shots, one of which accidentally struck a soldier in the right groin inflicting a severe wound, were fired, at the dead body.

The soldiers wounded by Jones are in the Hospitals of their respective regiments, and their injuries, though severe, are doing well. The soldier, accidentally shot, it is also thought will recover from his wound.

the arrest of the other parties implicated.

We purposely refrain from mentioning names, or making any comments that would excite or prejudice the public mind against the parties involved in this unfortunate occurrence.

The particulars of the affair, as we have given them above, are mainly derived from the evidence taken before the Coroners jury.

The Curtin Lifted.

A few interested friends of Gov. CURTIN are exceedingly anxious to screen his Excellency from the suspicion of conniving at, or participating in, the frauds and swindles practiced upon our brave soldiers who came so promptly and gallantly forward to defend the honor of our State and the flag of our Country.

WASHINGTON, May 20. HIGEST CLYMER, Esq., State Senator Dear Friend:—

We are the just of all other State troops, and were Andrew G. Curtin to visit the quarters of the 5th Regiment of Pennsylvania Volunteers, he would be received with groans and huzzas.

I worked hard, as you know, for Governor Curtin. It is the only vote I ever cast that I regret. I have never asked a favor of him, and never expect to ask one.

P. S.—You may have as much of this letter published in Reading as you may see fit.

WASHINGTON, May 22. Hon. HIGEST CLYMER. Dear Sir:—As I have reported partially to you, I may as well in full.

you ever saw. In one box that we opened first, four overcoats were of different material, and of four different shades.

I only wish you would come on here and see the 4th and 5th Regiments, of Pennsylvania Volunteers, for yourself, so as to be satisfied.

Yours, FRANK M. COOLEY

Jeff. DAVIS and his cabinet, are reported as having taken leave of Montgomery, and removed their headquarters to Richmond.

Diploma

The design of the diploma to be given every man serving in the United States service during the war, is stated by the Star to be a most beautiful artistic achievement.

Successful.

The calcium light taken to Fortress Monroe has had a successful trial. A few nights since it was placed on the land side, and Col. Duryes's encampment was lighted up so that the tents and men could be seen with a distinctness that would permit the guns of the fortress to be served on an enemy there with nearly the precision of day light.

The following table shows the date of the passage of ordinances of secession by eleven States:

- 1. South Carolina—December 20. 2. Mississippi—January 9. 3. Alabama—January 11. 4. Florida—January 11. 5. Georgia—January 19. 6. Louisiana—January 26. 7. Texas—February 1. 8. Virginia—April 17. 9. Arkansas—May 6. 10. Tennessee—May 7. 11. North Carolina—May 21.

The Plans of the Campaign.

A correspondent of a leading New York paper claims to have possession of the purposes of the government and its plan of the campaign.

The Albany Argus says the fixing of the date as early as the 4th of July, looks as if this scheme had been communicated by Secretary Seward.

When recently a member of the Cabinet asked the veteran General if it would not be well to push forward a column of troops into Virginia, the old soldier replied, "that he had never yet lost a division of an army, and did not intend to; that if such a move were made, then one of three things must happen—it would be cut off; or be compelled to retreat; or the rest of the army would have to be advanced to support it, before it was ready either of which would be very disastrous."

The entrenched camps and erected batteries near Washington, do not look like preparations to advance. For the present, the defence of the line of the Potomac is the object of the Government, and this includes the retaking of Harper's Ferry and the Gosport Navy Yard.

On the 4th of July the war will have begun. Neither in fact, nor in theory, nor according to the forms of the Constitution is it yet begun.

The Sun learns that in addition to Frederick, Williamsport and Hagerstown, Hancock and Cumberland, Md., were both about to be occupied by Federal troops.

The two large columbiads sent down from the Pittsburg foundry, and intended for Fort Mifflin, were spiked while left standing on the godolias at North street over night.

The Fourth Pennsylvania Regiment.

A Washington correspondent of the New York Post writes as follows:—"One of the officers of the Fourth Pennsylvania Regiment tells the following story to illustrate the condition of the troops."

The Mobile FISHERIES.—The Mobile FISHERIES does not fancy the idea of being starved out. It says of the Mobile fishery industry applied to the catching and preserving of the fish would produce an immense amount of food.

COMPLAINING.

The Detroit Daily Advertiser says:—"For several days past the food given to the companies quartered on the Miamis has been of a nature which it would be so to set before swine; or Saturday noon, the Artillery Company and a portion of Company L gave expression to the disgust of the staff placed before them by capitulating the tab."

THE STOPPAGE OF ENGLISH FACTORIES.

The Star of Great says:—"The American news is eagerly anticipated every day, not only by the natives of that country but also by all the ship-brokers and mercantile men of the port, who are seriously affected by the war that has broken out."

RANSACKED SEIZURE AT MEMPHIS.

The Pittsburg Evening Chronicle of yesterday says:—"We learn by private letter received by the well known Pittsburg coal firm of Riddle, Coleman & Co., that on the 19th all their property at Memphis was seized by order of that inflated gas bag, General Pillow."

PAYOR "SOLD."

The Newbern Mercury writes, a company attached to Gen. Bagot A. Fryer's regiment, consisting of seventy-five men, were sent last Thursday morning to one against another. They were surrounded the next day by Gen. Fryer's "Officers" in a part of Pennsylvania.

Valley Spirit.

CHAMBERSBURG, JUNE 5, 1861.

Child Lost.—On Thursday evening last, about six or seven o'clock, a child, three years old of Mr. Daniel Grace, of Path Valley, this county, during the absence of its parents, for a short time, wandered from its home—straying unprotected in the woods. Immediate search was instituted by the neighbors at large, but no trace of the little wanderer could be found at a late hour of the night. On Friday morning, Mr. Jacob Caylor, who on his way through the woods, came upon the child, at the distance of two miles from home, in a leafy thicket. The little creature complained of hunger, but it was soon borne home, there to receive the caresses and attention of kind parents.

Important News.—Pure Brandy and Wine, for medicinal purposes only, can be had at Miller & Henchey's. Pure Champagne, of the greatest quality, with you have medicines, get them here. There will be no difficulty in this if you call at Miller & Henchey's drug store, as their stock is fresh and pure.

Worm Landy.—This is the greatest medicine you have for the cure of all worms in the human system. It is a powerful medicine, and will cure all worms in the human system. It is a powerful medicine, and will cure all worms in the human system.

No Cotton.—The accounts received at New Orleans from different portions of the South are not favorable to an extensive yield of cotton this year, as a good portion of the land hitherto devoted to its culture has been set apart for the production of grain and hay. There will, however, be no difficulty in getting a crop of cotton this year, as a good portion of the land hitherto devoted to its culture has been set apart for the production of grain and hay.

The Cotton Trade.—The civil war and blockade is likely to produce something of a panic in the Liverpool market, and will turn attention more than ever to stimulate the production of other cotton growing countries. At the South they begin already to feel the evil of an interrupted business with the North. The cutting off of the supply of cotton does not seem in the least to affect the prices of clothing. This is fully proved by saying a visit to the fashionable clothing Emporium of A. J. WILHELM, where you can purchase a magnificent suit of clothes at the most reasonable prices.

A Word for Husbands.—Do not treat your wife as any other subject in which there is danger of wounding her feelings; remember she treasures every word you utter. Do not speak of merits in another man's wife, in a way to imply fault in your own. Do not treat your wife with intemperance in company. Do not appear in the presence of a third party. Be careful to be neat in your appearance before your wife, which can be done by always carrying your Hair and Caps from J. L. BUCHHEIM, who has always on hand a large and varied stock.

Keep Cool.—The preservation of good temper, as frequently, one of the principal causes of success in any vocation or undertaking. The clearness of our perception depends so much on the absence of excitability of any kind that the judgment loses its balance the moment that we are subject to any stimulus, either natural or artificial. In the midst of the present excitement we should work calmly, and show our presence of mind by purchasing our cigars and tobacco from J. D. JACOBS, on the corner of Main and Queen streets.

Removal.—BITTER & HAMILTON'S Tin and Stove Store has been removed to the corner of the Diamond, in the room lately occupied by Heacock's Clothing Store and nearly opposite the Bank, where they will continue to keep all kinds of Cook Stoves for Wood or Coal. Parlor Stoves of all kinds, Tin, Copper, Sheet Iron and Japanned ware. Having greatly enlarged the Room we will have a greater variety of choice than we have ever had, give us a call and see the new assortment.

As ADVENTURER at HARPER'S FERRY.—An Agent of the Government who has, within the past two days, visited Frederick and Harper's Ferry, returned this afternoon and made his report to General Scott and the President. He was last Friday, by way of Frederick to Harper's Ferry. There was nothing attractive at the former place, and he pushed on to the latter, where he was seized and placed under guard two nights and a day, although he had many friends in the ranks. They took his pistol and such effects as he had, but were of any use to them, and finally, by some management and the assistance of his friends among the soldiers, he was allowed to leave the place. He made his way to rapidly as possible to the Rocky Mountains.

The Government informs me that there are 30,000 men in the ranks. They are all including one thousand stationed at Point of Rocks. He represents the position of the army as a very strong one, but the men were ill equipped and in bad temper. He says frequent dissensions between officers and soldiers. They speak most of their time in carrying and drilling. The troops are much demoralized, but he thinks they will make a desperate fight at first. There were indications of an insurrection in the past, but he could not get positive information. They expect an attack from the West.

Pain Remedy.—A body of 3000 men, headed from Congress in New Orleans have been sent and are on their way. The non-commissioned officers were more numerous than the commissioned ones, but they are commended by the Government. The whole body had collected for general service and was not to be ordered in any way, but on the option of the authorities. Since, the West being armed in many ways.

The Fight at Aquia Creek. Yesterday, at half past 10 o'clock, a. m., the Federal Artillery, Regulars, and a small company, opened fire on the two batteries at Aquia Creek—one of which is on the west, the other in a hollow between two hills, about a mile below. At 12 m. the battery on the west had completely silenced, and the vessels all landed down to the battery, preparing to engage. It was not till 1:30 p. m. that the battery on the west opened fire. It was not till 1:30 p. m. that the battery on the west opened fire. It was not till 1:30 p. m. that the battery on the west opened fire.

Worm Landy.—This is the greatest medicine you have for the cure of all worms in the human system. It is a powerful medicine, and will cure all worms in the human system. It is a powerful medicine, and will cure all worms in the human system.

No Cotton.—The accounts received at New Orleans from different portions of the South are not favorable to an extensive yield of cotton this year, as a good portion of the land hitherto devoted to its culture has been set apart for the production of grain and hay.
